

# Program Overview

Our comprehensive curriculum provides you the knowledge and skills to be an immediate and vital member of the healthcare team. Our program is designed to develop critically-thinking nursing students, ready to function in a rapidly-changing healthcare system. Certain areas of study include but are not limited to the following:

## Nursing Fundamentals

Classes such as: Foundations of Nursing, Pharmacology, Nursing Skills, Nutrition, Anatomy and Physiology, and Growth & Development ensure the readiness of students to provide holistic and culturally competent care to patients of all ages before going to the various clinical sites.

## Medical Surgical Nursing

Classes that focus on various diseases affecting various body systems such as: Nervous, Cardiac, Respiratory, Digestive, and Musculoskeletal systems. These classes integrate information to continuously augment and ensure mastery of knowledge.

## Labor & Delivery

Learn the complexities of mother-baby care. Focus on client education, communication, assessment, and providing comprehensive nursing care.

## Leadership & Career Preparation

Focus on developing and improving interpersonal and leadership skills. Anticipate prospective employment with resume building, interviewing techniques and preparation. Complete NCLEX-PN review program to ensure success at the boards!

# Career Opportunities
